

MSIT Admissions 2026 - 27

Master of Science in Information Technology | January 2027 Cohort

The **Consortium of Institutions of Higher Learning (CIHL)** invites applications for admission to the **Master of Science in Information Technology (MSIT)** programme for the cohort commencing on **2 January 2027**. The programme has been comprehensively redesigned in collaboration with the **Centre for Educational Technology and Learning Sciences (CETLS)**, **IIIT Hyderabad**, with a focus on AI-enabled learning, computing foundations, applied research, software engineering, and venture creation.

Programme 4 semesters	Starts 2 Jan 2027
Tuition INR 1,50,000 / semester	Format Full-time
Degree awarded by IIIT Hyderabad	

Eligibility

Graduates with **16 years of formal education** with a willingness to work with **Computer Science, AI and Math**.

Admission Process

1. Online Registration

Submit the application and academic details through the MSIT admissions portal.

2. Aptitude Evaluation

Candidates may qualify through **GRE, GATE, or the MSIT Entrance Examination**, as applicable.

3. Interview and Selection

Shortlisted candidates will undergo an interactive interview. Final admission will be based on overall performance in the selection process.

Programme Structure

Semester 1 - Computing Foundations

- Learning to Learn with AI Tools
- Algorithms and Data Structures
- Computer Systems

The programme will strongly emphasize contemporary **AI-assisted software engineering tools and practices**. By the end of the first year, students are expected to be capable of designing and building substantial software systems using modern AI-enabled development workflows.

Semester 2 - Research Co-op

Students will undertake a **half-time co-op in research laboratories at IIIT Hyderabad**, working on applied AI and software solutions emerging from deep-tech research.

The remaining half follows the **Learning to Learn** model. Students will study **one core AI course + one elective** [to be selected as per their interests and goals]. **Electives will be governed by a one-on-one learning contract** agreed with a mentor in advance; assessment is based on the objectives and deliverables specified in that contract.

Semester 3 - Venture-Building Studio

Students will develop technology-driven products and ventures in a venture-building studio. By the end of the semester, they will have the opportunity to pitch to **early-stage investors and venture capital representatives**.

Semester 4 - Startup or Industry Co-op

Students who secure suitable funding may continue developing their startup. Other students will undertake a **co-op engagement with an industry partner**, working on substantial technology and AI-driven projects.

Tuition Fee

INR 1,50,000 per semester

Programme Commencement

2 January 2027

Applications

Applications for the January 2027 cohort will be accepted through the **MSIT online admissions portal**. Detailed information regarding the application schedule, MSIT Entrance Examination, interview process, selection procedure, fee payment schedule, and student onboarding will be made available on the MSIT website.
